Description:

Forum is revolutionary software that connects supply chain members through the internet, helps implement a continuous replenishment mechanism, helps reduce inventory levels, Cuts operations costs and makes channel members more efficient**.** It can be easily rolled out in any distribution network.

Forum has in-built inventory management software that members of the distribution network can use to perform their routine operations like ordering, invoicing etc. It has a host of powerful features like automatic generation of purchase orders that would make inventory management really simple. Further, Forum helps supply chain members to exchange business documents including purchase orders, Invoices, and stock statements etc. Forum can also be integrated with any ERP through appropriate middleware.

News Page is a web based application which runs on IIS (Internet Information Services). This is a sales force automation (SFA) system which is easy to use. ITC InfoTech has launched an end-to-end field sales force automation solution powered by news page EXPRESS™, an enterprise class mobility framework. this solution manages and automates the activities of distributors, sales and trade marketing representatives. this mobility solution is aimed at managing the sales team, monitor performance at all times and provide faster and up-to-date access to customer information. The technology framework underlying the solution works across a mix of field level devices called handheld devices (PDA's). Additionally, this solution is independent of operating system on which the device is running. This solution also interfaces with inventory applications like Forum Micro-ERP systems.

Technical Skills:

Operating Systems: MS Windows, Linux.
- MS Windows: XP, 7, 8,10,2003, 2008.
- Linux: RHEL 5.4, 6.0, 6.1, 6.3, 6.5, Centos 6.3, 6.7,7, Suse-10, 11, 12.
- Cloud :VMWARE

Installation and configuration of samba, Apache assembling and maintenance of various server machines IBM, INTEL, HP. Configuration and troubleshooting of Linux OS & Applications. Familiar with various features of Linux like NFS, Backup, FTP, SAMBA, and DHCP etc.
